AMENDMENTS TO THE CLAIMS

RECEIVED
CENTRAL FAX CENTER
JUL 13 2007

- Please amend the claims as follows:

1. (Cancelled) ~~An aqueous decontamination formulation for use in disinfection and sterilization, said formulation consisting of:~~

~~a reactive compound selected from the group consisting of nucleophilic compounds and oxidizing compounds;~~

~~a water-soluble bleaching activator selected from the group consisting of ethylene glycol diacetate, propylene glycol monomethyl ether acetate, methyl acetate, diethylene glycol monoethyl ether acetate, glycerol acetate (monoacetin), glycerol diacetate (diacetin), glycerol triacetate (triacetin), acetylcholine chloride, 4-cyanobenzoic acid, propylene glycol diacetate, and combinations thereof;~~

~~an inorganic base; and~~

~~water.~~

2. (Cancelled) ~~The formulation of claim 1, consisting of (by weight percentage):~~

~~0.5-60 % reactive compound;~~

~~1-10 % bleaching activator;~~

~~3-30% inorganic base~~

~~and~~

~~water (remainder).~~

3. (Currently Amended) An aqueous decontamination formulation for use in disinfection and sterilization, said formulation consisting of (by weight percentage):

0.5-60 % reactive compound selected from the group consisting of nucleophilic compounds and oxidizing compounds;

1-10 % water-soluble bleaching activator selected from the group consisting of ethylene glycol diacetate, propylene glycol monomethyl ether acetate,

methyl acetate, diethylene glycol monoethyl ether acetate, glycerol acetate (monoacetin), glycerol diacetate (diacetin), glycerol triacetate (triacetin), acetylcholine chloride, 4-cyanobenzoic acid, propylene glycol diacetate, and combinations thereof;

3-30% inorganic base; and

water (remainder);

The formulation of claim 2, wherein:

said reactive compound comprises hydrogen peroxide;

said bleaching activator comprises glycerol diacetate or propylene glycol diacetate; and

said inorganic base comprises potassium acetate.

4. (Cancelled) ~~An aqueous decontamination formulation for use in disinfection and sterilization, said formulation consisting of:~~

~~a reactive compound selected from the group consisting of nucleophilic compounds and oxidizing compounds;~~

~~a water soluble bleaching activator selected from the group consisting of ethylene glycol diacetate, propylene glycol monomethyl ether acetate, methyl acetate, diethylene glycol monoethyl ether acetate, glycerol acetate (monoacetin), glycerol diacetate (diacetin), glycerol triacetate (triacetin), acetylcholine chloride, 4 cyanobenzoic acid, propylene glycol diacetate, and combinations thereof;~~

~~an inorganic base;~~

~~water; and~~

~~one or more sorbent additives selected from the group consisting of sodium carbonate, sodium bicarbonate, potassium carbonate, potassium bicarbonate, calcium carbonate, potassium silicate, precipitated silicates, percarbonates, amorphous silica, fumed silica, sodium citrate, dendritic salt (sea salt), citric acid, polyethylene glycol, PEG 8000, urea, and polyols.~~

Application No. 10/765,678
SD-7463

5. (Currently Amended) An aqueous decontamination formulation for use in disinfection and sterilization, said formulation consisting of:

a reactive compound selected from the group consisting of nucleophilic compounds and oxidizing compounds;

a water-soluble bleaching activator selected from the group consisting of ethylene glycol diacetate, propylene glycol monomethyl ether acetate, methyl acetate, diethylene glycol monoethyl ether acetate, glycerol acetate (monoacetin), glycerol diacetate (diacetin), glycerol triacetate (triacetin), acetylcholine chloride, 4-cyanobenzoic acid, propylene glycol diacetate, and combinations thereof;

an inorganic base;

water; and

one or more sorbent additives selected from the group consisting of sodium carbonate, sodium bicarbonate, potassium carbonate, potassium bicarbonate, calcium carbonate, potassium silicate, precipitated silicates, percarbonates, amorphous silica, fumed silica, sodium citrate, dendritic salt (sea salt), citric acid, polyethylene glycol, PEG 8000, urea, and polyols;

~~The formulation of claim 4, wherein said sorbent additive comprises one or more polyol compounds selected from the group consisting of sorbitol, mannitol, hydrogenated starch hydrolysates (HSH), maltitol, zylitol, lactitol monohydrate, anhydrous isomalt, erythritol, and polydextrose.~~

6. (Previously Presented) An aqueous decontamination formulation for use in neutralization of a toxant, said formulation consisting of (by weight percentage):

0.5-60 % hydrogen peroxide;

1-10 % glycerol diacetate or propylene glycol diacetate;

3-10% potassium carbonate;

and

water (remainder).

Application No. 10/765,678
SD-7463

7. (Previously Presented) An aqueous decontamination formulation for use in neutralization of a toxant, said formulation consisting of (by weight percentage):

- 0.5-60 % hydrogen peroxide;
- 1-10 % glycerol diacetate or propylene glycol diacetate;
- 5-30% potassium acetate;
- and
- water (remainder).

8-28. CANCELLED

29. (Cancelled) ~~The formulation of claim 1, wherein the inorganic base is selected from the group consisting of potassium carbonate, potassium bicarbonate, potassium hydroxide, potassium sulfate, potassium phosphate (dibasic or tribasic), potassium borate, potassium tetraborate, potassium acetate, sodium carbonate, sodium bicarbonate, sodium hydroxide, sodium sulfate, sodium phosphate (dibasic or tribasic), sodium borate, sodium acetate, ammonium carbonate, ammonium bicarbonate, ammonium hydroxide, ammonium sulfate, ammonium phosphate (dibasic or tribasic), ammonium borate, ammonium acetate, calcium carbonate, calcium bicarbonate, calcium hydroxide, calcium sulfate, calcium phosphate (dibasic or tribasic), calcium borate, calcium acetate, magnesium carbonate, magnesium bicarbonate, magnesium hydroxide, magnesium sulfate, magnesium phosphate (dibasic or tribasic), magnesium borate, magnesium acetate, sodium percarbonate, ammonium hydrogen bicarbonate and lithium bicarbonate, and combinations thereof.~~

30. (Currently Amended) An aqueous decontamination formulation for use in disinfection and sterilization, said formulation consisting of:

- a reactive compound selected from the group consisting of nucleophilic compounds and oxidizing compounds;

Application No. 10/765,678
SD-7463

a water-soluble bleaching activator selected from the group consisting of ethylene glycol diacetate, propylene glycol monomethyl ether acetate, methyl acetate, diethylene glycol monoethyl ether acetate, glycerol acetate (monoacetin), glycerol diacetate (diacetin), glycerol triacetate (triacetin), acetylcholine chloride, 4-cyanobenzoic acid, propylene glycol diacetate, and combinations thereof;

an inorganic base; and

water;

~~The formulation of claim 1,~~ wherein said water-soluble bleaching activator is acetylcholine chloride or 4-cyanobenzoic acid.
